What is a Plant?

Plants are **living** things. Most grow in soil. They can be very small or very large.

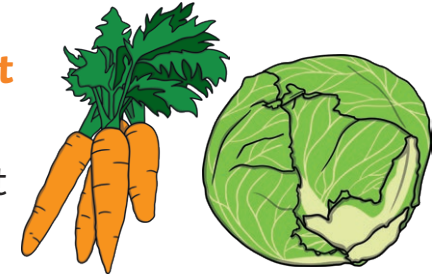

Fruit and Vegetables

Some **plants** grow **fruit**, which is a part of a **plant** that contains the **seeds**. Some can be eaten.

A **vegetable** is a part of a **plant** that can be eaten as food. **Vegetables** come from different parts of the **plant**.

What Do Plants Need to Grow?

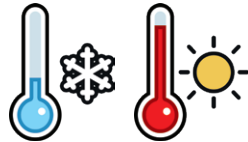

To grow and stay healthy, **plants** need:

water

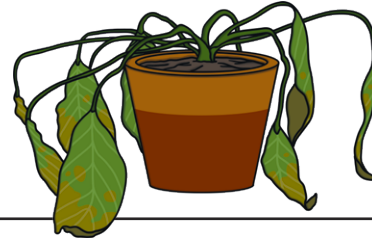

light

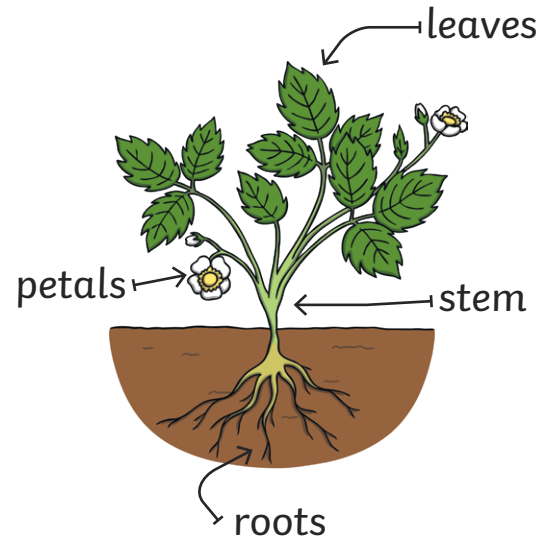

a suitable temperature

Different **plants** need different amounts of water and **sunlight** and different temperatures.

If a **plant** does not get what it needs, it will not grow healthily.

Parts of a Flowering Plant

Parts of a Tree
