

## Key Vocabulary Overview

<b>plant</b>	a living thing that usually grows in soil and often has leaves, roots and a stem
<b>seed</b>	a part of a plant that a new plant grows from

## Plants

**Plants** are living things. Most **plants** grow in **soil**.

Most **plants** have a **stem**, **roots** and **leaves**.

Many **plants** can also have **flowers**. You may see fewer **plants** during winter because the cold can make it harder for **plants** to grow.

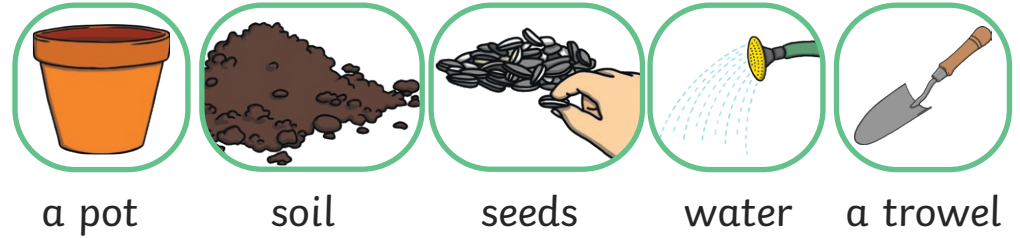

## Seeds

**Seeds** grow into **plants**. They come in different shapes, sizes and colours.

## Growing Plants

To grow **plants**, you will need:

a pot

soil

seeds

water

a trowel

## Observing Plants

As a **seed** grows into a **plant**, you might notice:

the plant  
growing  
new leaves

the stem  
growing  
longer

the roots  
getting  
longer

You might see other changes, such as the colour changing or flowers growing.
